

# Wagon Fleet Management

As a European rail freight operator with Belgian roots, Lineas offers reliable rail solutions, operating block trains for conventional and intermodal loads and providing single wagon load transport throughout Europe. Lineas owns the largest wagon fleet in Belgium and rents these assets to interested parties.

- Different types of wagons available for rent on (very) short and long term.
- Interesting tariffs in line with your needs.
- Our mobile teams are available throughout Belgium for all traction & rail activities, supply of spare parts and corrective and preventive maintenance. Our mobile teams are linked with the Belgian stations and all of our technical visitors.
- The Entity in Charge of Maintenance (ECM) of Lineas guarantees that the wagons are maintained in conformity to the maintenance documents for each wagon and the applicable requirements. This includes maintenance regulations and the VPI rules.

**More information: consult our catalogue on [www.lineas.net](http://www.lineas.net) or contact us**
